RERERRAL LIST
CERTIFIED BACKFLOW PREVENTION DEVICE TESTERS

The following contractors, maintenance repair workers, and Stinson Beach County Water District Staff are familiar with the Rules and Regulations of the Stinson Beach County Water District as regards the installation, testing, maintenance and Code compliance of cross-control devices (backflow prevention devices.) The District cannot provide recommendations and suggests the District customers check references prior to entering into a contract. Each list tester has provided the District with both proof of AWWA (American Water Works Association) certification and certification of the testing equipment. Any other AWWA certified tester with appropriate certification documents filed with the District may be hired to perform work in the Stinson Beach Area. The only purpose of this list is to assist the property owner in finding a tester; they are listed alphabetically.
